SUBJECT INDEX VOLUME 45-49

- Acetamide utilization
 - fungi, 45:437
- Acidophilic bacteria
 - energy conservation, 47:579
- Actinomycetes
 - isoprenoid quinones, 45:316
- Adenosine 3',5'-phosphate
 - fungi, 45:462
- prokaryotes, 45:620
- Adenosine 3',5'-phosphate-binding proteins
 - fungi, 45:462
- Adenosine 3',5'-phosphate-dependent protein kinase
 - animals, 45:462
 - fungi, 45:462
- Adenosylmethionine hydrolase
 - phage T3 or T7 virus-host cell interactions, 45:9
- Adenovirus gene expression control, 46:377
- Adenovirus transmission
 - vertebrate germ line, 45:267
- Adenylate cyclase
 - fungi, 45:462
 - prokaryotes, 45:620
- Adhesins, host-specific fimbriae
 - noninvasive enterotoxigenic *E. coli*, 46:129
- Aeration
 - cultivation and nutrition of caulobacters, 45:123
- Aerobes
 - isoprenoid quinones, 45:316
- α -Hemolysin
 - E. coli*, 48:326
- Alcaligenes eutrophicus*
 - cyclic nucleotides, 45:620
- Aldrin
 - microbial metabolism, 46:95
- Alkylation products
 - phage DNA repair, 45:72
- Amino acid levels
 - N. crassa* growth, 45:99
- Amino acids, microorganisms
 - organochlorine insecticide effects, 46:95
- Amoebae
 - proteinases, 46:308
- Anaerobes
 - isoprenoid quinones, 45:316
- Anemia, equine infectious
 - transmission via vertebrate germ line, 45:267
- Animal cell mitochondria
 - deoxyribonucleic acids, 46:208
- Animals
 - mitochondria, 46:1
 - papillomaviruses, 46:191
- Antibiotic-producing bacteria
 - antibiotic resistance, 45:591
- Antibiotic resistance
 - pathogenic bacteria, 45:591
 - producing bacteria, 45:591
- Antibiotic resistance gene function
 - evolution, 45:355
- Antibiotic resistance plasmids
 - influence on phage T3 or T7 multiplication, 45:9
- Antibody
 - complement-virus interactions, 46:71
- Antigenic cross-reactivity
 - animal papillomaviruses, 46:191
- Antigenic properties
 - picornaviruses, 45:287
- Aortic smooth muscle cells
 - cholesterol ester accumulation, 46:296
- Archaea
 - Archaeobacteria
 - endosymbiont hypothesis, 46:1
 - isoprenoid quinones, 45:316
 - Arenavirus transmission
 - fetal development in mammals, 45:267
 - vertebrate germ line, 45:267
- Arthropods
 - virus transmission via germ line, 45:267
- Aspartic proteinases
 - fungi, 46:308
- Asticacaulis*
 - taxonomy, 45:123
- Atheroma
 - evolutionary hypothesis, 46:296
- Atmospheric chemistry
 - denitrification, 46:43
- Bacillus licheniformis*
 - teichuronic acid biosynthesis, 45:211
- Bacillus subtilis*
 - linkage map, 49:158
 - menaquinone biosynthesis, 46:241
 - succinate dehydrogenase, 45:542
 - transfer ribonucleic acid
 - gene structure and organization, 49:71
- Bacteria
 - denitrifying, 46:43
 - division, 46:341
 - evolution of antibiotic resistance gene function, 45:355
 - growth, 46:341
 - isoprenoid structural types, 45:316
 - methane-utilizing, 45:556
- Bacterial conjugation
 - plasmid DNA processing, 48:24
- Bacterial deoxyribonucleic acid
 - topoisomerases, 48:273
- Bacterial outer membrane
 - permeability
 - molecular basis, 49:1
- Bacterial toxins
 - lethal amounts, 46:86
- Bacteriophage
 - DNA, repair, 45:72
- Bacteriophage BF23
 - Colb factor-induced abortive infection, 45:52
- Bacteriophage λ
 - RNA processing, 45:502
- Bacteriophage λ growth
 - interactions of phage and host macromolecules, 48:299
- Bacteriophage λ lysogens
 - phage replication inhibition, 45:52
- Bacteriophage P2
 - abortive infections, 45:52
- Bacteriophage replication inhibition
 - extrachromosomal genetic elements, 45:52
- Bacteriophages
 - filamentous
 - multiregulatory element, 49:101
- Bacteriophage survival
 - avoidance of DNA restriction systems of the hosts, 47:345
- Bacteriophage T1
 - replication inhibition by λ lysogens, 45:52
- Bacteriophage T3
 - virus-host cell interactions, 45:9
- Bacteriophage T4
 - transfer RNA, 45:502
- Bacteriophage T5
 - Colb factor-induced abortive infection, 45:52
 - replication inhibition by λ lysogens, 45:52
- Bacteriophage T7
 - messenger RNAs, 45:502
 - virus-host cell interactions, 45:9
- Bacteriophage W31
 - inhibition by ColB2, 45:52
- Bacteroides melaninogenicus*
 - menaquinone requirement, 46:241
- Benckea harveyi*
 - cyclic nucleotides, 45:620
- BK virus
 - persistent infection, 46:384
- β -Lactam antibiotics
 - resistance in pathogenic and producing bacteria, 45:591
- Bordetella*
 - cyclic nucleotides, 45:620
- Bovine papillomavirus
 - immunity, 46:191
 - pathogenesis, 46:191
- Carbohydrate metabolism
 - meningococcus pathogenicity, 46:162
- Carbon dioxide
 - meningococcus pathogenicity, 46:162
- Carbon metabolism
 - methanotrophs, 45:556
- Carbon, organic
 - denitrification, 46:43
- Carbon sources
 - cultivation and nutrition of caulobacters, 45:123
- Catabolic pathways, microorganisms
 - organochlorine insecticide effects, 46:95
- Caulobacter*
 - taxonomy, 45:123
- Caulobacters
 - caulophages, 45:123
 - cell structure and composition, 45:123
 - cellular differentiation, 45:123
 - cultivation and nutrition, 45:123
 - distribution, 45:123
 - ecology, 45:123
 - taxonomy, 45:123
- Caulophage receptors
 - caulobacters, 45:123
- Caulophages
 - host ranges, 45:123
 - isolation, 45:123
 - lysogeny, 45:123
 - transduction, 45:123
- Cell membrane, microbial
 - organochlorine insecticide effect, 46:95
- Cell morphology, microorganisms
 - organochlorine insecticide effects, 46:95
- Chemostats
 - selection in, 47:150
- Chlorobenzilate
 - microbial metabolism, 46:95
- Chloroplasts
 - deoxyribonucleic acids, 46:208

- Chloropropylate
microbial metabolism, 46:95
- Cholesterol esters
accumulation, 46:296
- Ciliates
proteinases, 46:308
- Coagulase-negative staphylococci
Staphylococcus epidermidis
epidemiological typing, 49:126
- Cocci
isoprenoid quinones, 45:316
- Coccobacilli, aerobic gram-negative
isoprenoid quinones, 45:316
- ColB2
phage W31 inhibition, 45:52
- Collb factor
abortive phage BF23 infection, 45:52
abortive phage T5 infection, 45:52
- Colicinogenic plasmids
influence on phage T3 or T7 multiplication, 45:9
- Coliform bacteria, enteric
cyclic AMP, 45:620
- Complement
interaction with virus and virus-infected cells, 46:71
- Complement system
components and activation, 46:71
host response to viral infection, 46:71
- Conjugation
caulobacters, 45:123
- Coryneform bacteria
isoprenoid quinones, 45:316
- Cottontail rabbit (Shope) papillomavirus
immunity, 46:191
pathogenesis, 46:191
- Coxiella burnetii*
Q fever, 47:127
- Cryptosporidiosis
animals, 47:84
humans, 47:84
- Cyclic AMP
see Adenosine 3',5'-phosphate
- Cyclic nucleotides
procaryotes, 45:620
- Cysteine proteinases
fungi, 46:308
- Cytochromes
mitochondria, 1, 46:
- Cytochromes c6 (f)
plastids, 46:1
- Cytomegalovirus transmission
fetal development in mammals, 45:267
- D-Alanine residues, ester-linked
teichoic and teichuronic acid biosynthesis, 45:211
- Dehydrochlorination
microbial organochlorine insecticide metabolism, 46:95
- Denitrification
aquatic systems, 46:43
bacteria, 46:43
global aspects, 46:43
methods, 46:43
physiology and biochemistry, 46:43
terrestrial systems, 46:43
- Deoxyribonucleic acid
caulobacters, 45:123
damage
E. coli, 48:60
mutagenesis and inducible responses, 60
- topoisomerases, 48:273
mitochondria, 46:1
- Deoxyribonucleic acid ligase
phage DNA repair, 45:72
phage T3 or T7 virus-host cell interactions, 45:9
- Deoxyribonucleic acid, parasitic
virus transmission via germ line, vertebrates, 45:267
- Deoxyribonucleic acid polymerase
phage DNA repair, 45:72
phage T3 or T7 virus-host cell interactions, 45:9
- Deoxyribonucleic acid recombination
phage T3 or T7 virus-host cell interactions, 45:9
- Deoxyribonucleic acid-relaxing enzymes
phage T3 or T7 virus-host cell interactions, 45:9
- Deoxyribonucleic acid repair
phage, 45:72
- Deoxyribonucleic acid restriction systems
phage survival, 47:345
- Deoxyribonucleic acids
organelles, 46:208
